DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 17-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no mention in the specification of the pallet being free of syndiotactic polystyrene. This is a negative limitation requiring explicit antecedent basis. See Ex parte Grasselli, 231 USPQ 393-394 (Board of Appeals 1983).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 23 and 24 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Haaf et al. 4,410,651, Haaf et al. 4,442,251, Abolins et al. 4,504,613 or Lee, Jr. 5,008,314.

Art Unit: 1714

5. Haaf et al. ('651) disclose PPE, HIPS and impact modifiers in claim 1 and flame-retardant in claims 9 and 10. Injection molding into desired shape and size is shown in column 3, lines 11-18. The contents of Haaf et al. ('251) are similar. Abolins et al. teach PPE, alkenyl aromatic polymer, impact modifier and flame-retardant in claim 1 and HIPS in claim 6. Molded articles are listed in column 6, lines 20-42. Lee, Jr. reveals PPE and polystyrene in claim 1, impact modifier in claim 8, HIPS in claim 9 and flame-retardant in claims 11-12. The composition is for molding articles. Pallet is the intended use and as such it has no patentable significance. In the alternative, since The Haas et al. patents say any desired article can be molded from the composition and Abolins et al. show dozens of molded articles, it would have been obvious to one having ordinary skill in the art; at the time the invention was made, to use the composition of the impact resistant, flame-retardant compound for molding pallets.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1714

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 17-24 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,784,234. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent is a species of the genus of the instant application.
